COULD HARDLY STAND ALONE

Terrible Suffering From Headache, Sideache, Backache, and Weakness, Relieved by Cardui, Says This Texas Lady.

Gonzales, Tex.—Mrs. Minnie Philpot, of this place, writes: "Five years ago I was taken with a pain in my left side. It was right under my left rib. It would commence with an aching and extend up into my left shoulder and on down into my back. By that time the pain would be so severe I would have to take to bed, and suffered usually about three days. I suffered this way for three years, and got to be a mere skeleton and was so weak I could hardly stand alone. Was not able to go anywhere and had to let my house work go. I suffered awful with a pain in my back and I had the headache all the time. I just was unable to do a thing. My life was a misery, my stomach got in an awful condition, caused from taking so much medicine. I suffered so much pain. I had just about given up all hopes of our getting anything to help me.

One day a Birthday Almanac was thrown in my yard. After reading its testimonials I decided to try Cardui, and am so thankful that I did, for I began to improve when on a well second bottle. I am now a well woman and feeling fine and the cure has been permanent for it has been two years since my awful bad health. I will always praise and recommend Cardui." Try Cardui today. 13-3p

The Guiding Eye

No work is done better, than it is seen. If seen indistinctly it will be more or less badly done. Deftness of hand can only come of keen vision. Quick and accurate thinking can only be accomplished when the eyes help—not obstruct—the brain. The manual worker knows how skillfulness results in additional pay. The mental worker is also well aware that quickness and keen perception bear golden fruit. These qualities depend chiefly upon the guiding eye.

Imperfect sight is a handicap which a veritable genius will find too difficult to surmount. It is a tax which is being paid every minute of every day, and inevitably causes wages or salaries to fall short of what they might have been. Imperfect sight naturally causes eye-strain and affects the health. Poor vision also means that we see a fraction of the beauties around us. Many of the wonders of Nature will be missed completely.

Good vision, then, contributes to good work, good health and the enjoyment of recreation.

Let me examine your eyes scientifically and prescribe the necessary lenses, if needed, or advise you what should be done.
